MEDICAL EDUCATION

Medical education in India has developed substantially in the 66 years since the Independence. Following a series of reforms, a diverse, multi-level system of higher education has been initiated, encompassing a full range of subjects and suited to the needs of the national economy and social development. India's institutions of higher Learning include comprehensive universities and specialized universities or institutes. These institutes and universities have been playing a leading role in the development of medical science and training of medical &scientific personnel.

Becoming a doctor is a childhood dream for many. Perhaps, there is no other career which commands such a respect and awe as medicine. The power to heal has placed the medical profession several rungs above all others. A doctor's profession involves a lot of hard work with a good degree of dedication and at the same time, it also brings with it the satisfaction of having cured people suffering from illness, disease and trauma.

A simple degree in medicine is however not enough for making a successful and a satisfactory career. One needs to do specialization in any of the branches of medicine or surgery to become a specialist of certain kind e.g., Paediatrics. Ophthalmology, Gynaecology, Surgery, Neuro-surgery. Neonatology etc. A doctor may also have to acquire certain computers & IT skills, which are necessary to operate and use sophisticated medical equipments, which not only help in exact diagnosis of an ailing patient but also provide options to use non-invasive methods of treatment.

Medical Education in India can be bifurcated into two categories - Clinical and Pre-clinical. Clinical studies consist of the basic sciences such as Anatomy, Physiology, Biochemistry, Pharmacology, Pathology whereas the pre-clinical studies involves teaching in the diverse fields of clinical medicine such as Internal Medicine. Paediatrics, Obstetrics and Gynaecology, Psychiatry and Surgery.

The advancement in medical sciences has enhanced our longevity and decreased mortality rates dramatically. However, industrialization and technological advancement has adversely affected our environment and lifestyles that has manifested in new types of diseases and ailments which poses a challenge to the medical fraternity.

Perhaps the most coveted professional education in India is in the field of Medicine. It is also the most expensive and of the longest in duration. The chance of an Indian becoming a doctor is less than one in a thousand. But the availability and the dependability of this one person could make life and death differences us the remaining 999. They are entitled to expect that this privileged medical graduate is well equipped to meet their health needs.

The demand for medical professionals for treatment as well as research work is ever increasing both within India and abroad. The ongoing liberalization of economy is expected to bring in better opportunities for medical professionals in terms of remuneration, research and working facilities.

A list of medical colleges accredited for M.B.B.S. by the Medical Council of India is made available through the Medical Council of India website (http://www.mciindia.org).

INDIA'S TOP MEDICAL COLLEGES

★★★★★

BUILTUP AREA | STUDENTS FROM 25 COUNTRIES | 13000+ STUDENTS | 1300+ FACULTY | 270+ RECRUITERS | 11000+ PLACEMENTS

ABOUT THE FOUNDER

The founder Sh. Tarsem Garg envisioned the beginning of a new era of education by focusing on a new kind of academic institution, one that could transform individuals into better global citizens.
The Maharishi Markandeshwar Education Trust was established around 21 years ago with a distinctive mission, a mission to grow, transform and educate.

"Strong principles and value based education have served us well, with our education reflecting in our students serving in various sectors at prominent positions, reaching people from all walks of life"

Tarsem Garg, Chancellor

When the Trust was established, quality education was a distant dream among private institutions in north India, specifically Haryana.
Under the leadership of Sh. Tarsem Garg, the Trust has scaled its infrastructure, broadened its horizons, while maintaining a culture of excellence.
Having been conferred with an Honorary Doctorate from a University of Central America, Sh. Garg through his 3 Universities at Mullana, Sadopur (Ambala) and Solan (Himachal Pradesh) and other independent institutions such as the MM Group of Institutions, Ramba (Karnal), MM International School, MM Education College & MM School of GNM at Mullana endeavours to address the educational needs of the students by driving towards excellence with a spirit of innovation.
Being a prominent philanthropist with a profound sense of responsibility, Sh. Garg has immensely contributed to the society through various community development programmes, including healthcare.
With education at an inflection point, the MM Group constantly strives to equip future leaders with the competence and character to address emerging global and social challenges.
