From the Vice Chancellor's Desk

Dr. P. N. Razdan

It gives me immense pleasure in presenting to you the Ninth Annual Report of the Dr. D. Y. Patil Vidyapeeth, Pune for the year 2012-2013. The present report covers administrative, academic, and co-curricular activities of the University and its constituent colleges/Institutions from 1st June 2012 to 31st May 2013.

We have often heard that Education makes a man. In today's fast-paced world, where everything is changing at a rapid pace, it is important that change be brought in the education system also. We at Dr. D. Y. Patil Vidyapeeth, Pune, believe that instead of being localized, the education should be globalized. Global education is a viewpoint that has risen from the fact that modern people live and interact in an increasingly globalised world. It not only provides an opportunity but also enables the students to reflect and share their point of view and role within a global, interconnected society. Global education is something that opens people's eyes and minds to the realities of the globalised world and awakens them to bring about a world of greater justice, equity, and Human Rights for all.

To achieve this purpose, we provide a global platform to our students, where collaboration with international counterparts is done along with interactions with internationally acclaimed guests so that the students passing out from the University have a global vision to their knowledge.

Emerging trends in technical and professional education call for value addition, which means that students must acquire something more than what is provided in the curriculum. There is need to enhance their communication skills, to develop professional ethics in them and to help them learn and develop human values and concern for humanity. The constituent colleges/institutions of the University have dedicated mentors and state-of-the-art infrastructure with well-stocked libraries and well equipped laboratories. The programmes being offered by the university are developed in consultation with experts from respective fields. The University encourages its teachers and students to undertake innovative and relevant research to spread value-added knowledge.

I wish you all a successful year filled with achievements, professional fulfillment, and growth as we rise to meet new challenges and opportunities for our University.

P. N. Razdan

A Resource and Information Centre – Library

Books are lighthouses erected in the great sea of time, said an American essayist. Man's quest for knowledge has led to the creation and accumulation of tremendous amount of information. This quest for knowledge knows no bounds and is never satisfied. A library caters to the knowledge-thirsty minds of thousands of people.

For an educational organization, a library functions like the brain. The richer the library, richer is the academic content of teaching-learning process. In keeping with this, the University has developed an excellent central library for the systematic collection, organization, preservation and dissemination of knowledge and information. It has a total floor area of 29638 sq. ft. with provisions for separate reading rooms for staff members and spacious reading rooms for students. The total collection of the libraries is more than 36,712 books and 2,273 journals. The libraries have been provided with Wi-Fi Internet facilities and students and faculty have open access to this facility.

In addition to this, every constituent institution/college has its independent library, abounding in latest and updated books and journals of the respective stream of knowledge.

There are 787 online journals in addition to 225 regular journals, which also include some of reputed journals, such as Oxford Journal of Brain, British Medical Bulletin, American Journal of respiratory and critical care medicine, British Journal of Sports medicine, Journal of Clinical Microbiology etc. Students & Staff Members are always taking the benefit of these journals in their regular studies. Dr. D.Y. Patil Vidyapeeth is one of the few Universities who have subscribed full access of Scopus journals.

Curriculum Designing is a continuous process in the University to ensure that students are getting advanced knowledge in the field of their specialty.

The students have appropriate flexibility to pursue the programme in respect with time and diversity. Slow learners and advanced learners are identified by way of mid-diagnostic survey. The slow learners are subjected to appropriate remedial drill/tutorial and advanced learners are provided with relevant ambience to meet the higher challenges.

The performance of the students is monitored in the form of End Semester/Annual Examinations. Continuous Assessment is done through internal assessment both for theory and for practicals separately.

All the programmes are designed at par with the guidelines of the respective Statutory Councils.
