### Library as Learning Resource

The University Libraries and computing services works hand in hand in acquiring and maintaining hardware and software resources for end users. Support for multiple platform is a necessity. Libraries will not have the necessary resources to cope by themselves with changes that will affect the whole academic community. Libraries whose sole purpose is to organise the acquisition and circulation of scientific journals access the most recent papers from their workstations. Indexing, Archiving and retrieving will remain but can become a global task of a Central Library.

General purpose of libraries possibly decentralised will offer books, CD-ROMS, workstations, workspace and guidance to less specialised users. Because of the multidisciplinary nature of current research they will remain useful to researchers as well as to students. The number books and journals published continues to grow. The collections of scientific journals, the other sectors of libraries will continues to grow at current rate. The library is the good place for providing study facilities and technologies to its students and faculties. Its staff is trained to help students and faculty while preserving precious resources.

The new role of libraries in the learning process will require programmes professional development for the staff and training for the users. The library buildings are moving forward a more vibrant and welcoming atmosphere using natural light and quality materials with flexibility for future growth.

The libraries are the intellectual heart and soul of the colleges and universities. Our libraries provide eloquent testimony of our commitment to serious study, the encouragement of diversity and the free exchange of ideas and a research environment. Strong digital libraries requiring participate collectively in support of research agendas are also must in this new environment.

You may have seen that the library is embarking on an exciting renovation of the new high technology with shifting in New high tech. hospital building in a spacious place for staking books, journal magazines with digital library system with wi fi facility and comfortable seating facility the update is focused on redesigning the library space students, faculty and research scholars. The library is equipped with necessary educational aids.

## Research

University can grow successfully only when teaching and research get together symbiotically as they have no independent existence. Furthermore, there is a long-term implication of quality of research on national development, since research is the means of knowledge creation. We have created a conducive environment to undertake collaborative research projects combining teaching learning and research, to nurture originality, creativity and novelty. I feel proud to state here that this year DPU published more than 700 papers in International and National journals of repute, which are indexed in Scopus, Pub Med, Web of Science and UGC approved journals. These cover a wide range of areas from medical, dental, biotechnology & bioinformatics, physiotherapy, nursing, ayurved, homoeopathy and management. There has been a significant rise in h- index from 30 to 38, indicating translational value and higher citations received by individual publication. The highest impact factor among the publications during the year under report was 53.254 (The Lancet 2018). Publishing papers is only one part of research, however, filing patents and writing books, chapters, editing books, forms yet another aspect. I am also proud to state that this year DPU has filed 9 patents of which 5 are published and 1 US patent was granted.

A research is impossible without funding. DPU has always been supporting research activities and has provided seed money of about 1 Crore during the year. In addition, this year university has received a total extramural grant of more than 4 Crores from Department of Biotechnology (DBT), Department of Science & Technology (DST), CSIR-IGIB, ICMR and foreign agencies like National Institute of Health, USA, University of Skovde, Sweden, Harvard Medical School Centre for Global Health Delivery Dubai and International Team for Implantology (ITI), Switzerland.

Dr. D. Y. Patil Vidyapeeth, Pune has established a state-of-the-art and unique “Molecular Diagnostic Laboratory”, which is inaugurated at the auspicious hands of Dr. Ramesh C. Deka, Former Director, All India Institute of Medical Sciences (AIIMS), New Delhi on 28th January 2019. The laboratory has been constructed as per the NABL and ICMR Guidelines. This Centre will also provide a platform for ongoing and proposed research theme areas, create awareness and sensitization among the population about the importance of detection and diagnosis of rare genetic diseases.

It is not possible to give a complete list of publications in referred journals and individual research funding received, however, an account of some achievements given below is an indication of our endeavor towards quality of research at DPU –

In the year 2018, DPU has published 243 papers in Scopus indexed journals. These cover a wide range of areas from Medical, Dental, Biotechnology & Bioinformatics and Physiotherapy. There has been a significant rise in h- index from 33 to 41, indicating translational value and higher citations received by individual publication. The highest impact factor among the publications during the year was 59.102 (The Lancet 2018). Also, this year (2018-19) DPU has filed 11 patents of which 8 are published and 1 US patent was granted.

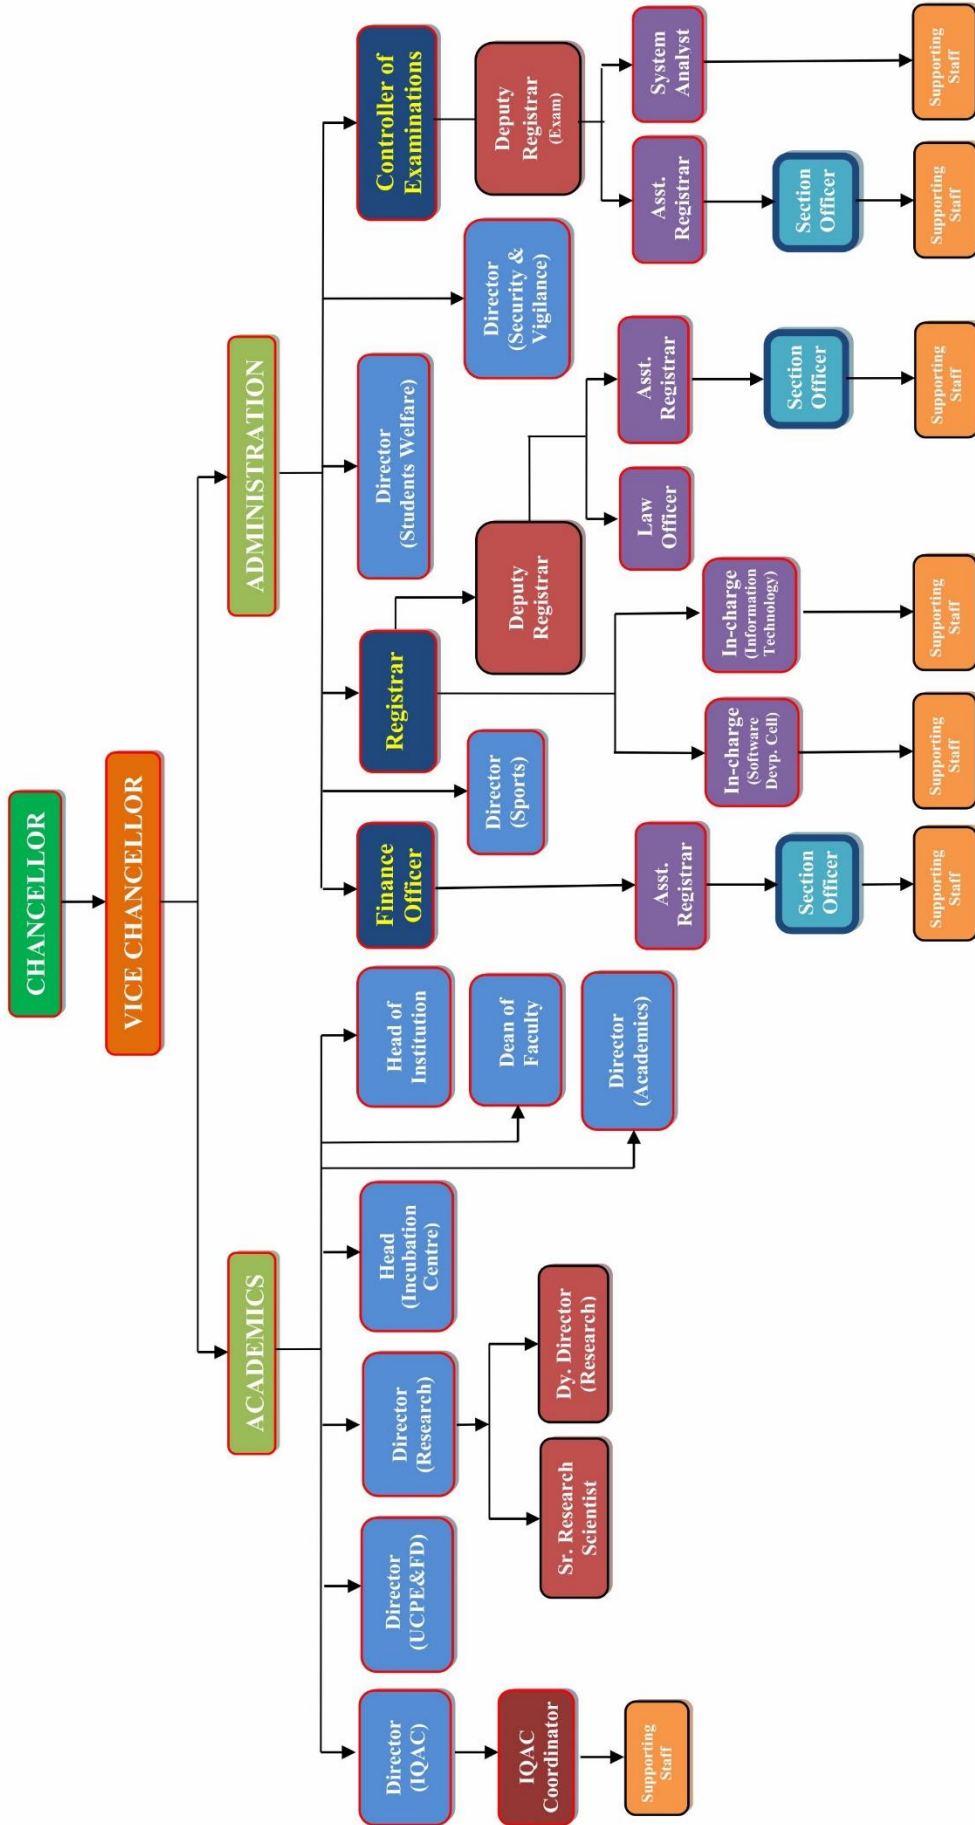

**International Research Collaborations:**

In keeping with our motto of 'Breaking Boundaries – Finding Frontiers' and one of our missions, namely, partnerships with organizations with congruent ideals, we have signed MoUs and collaborative agreements with many institutions worldwide. The International linkages of DPU have helped it in drawing upon the wisdom built up at the partner institutions of repute.

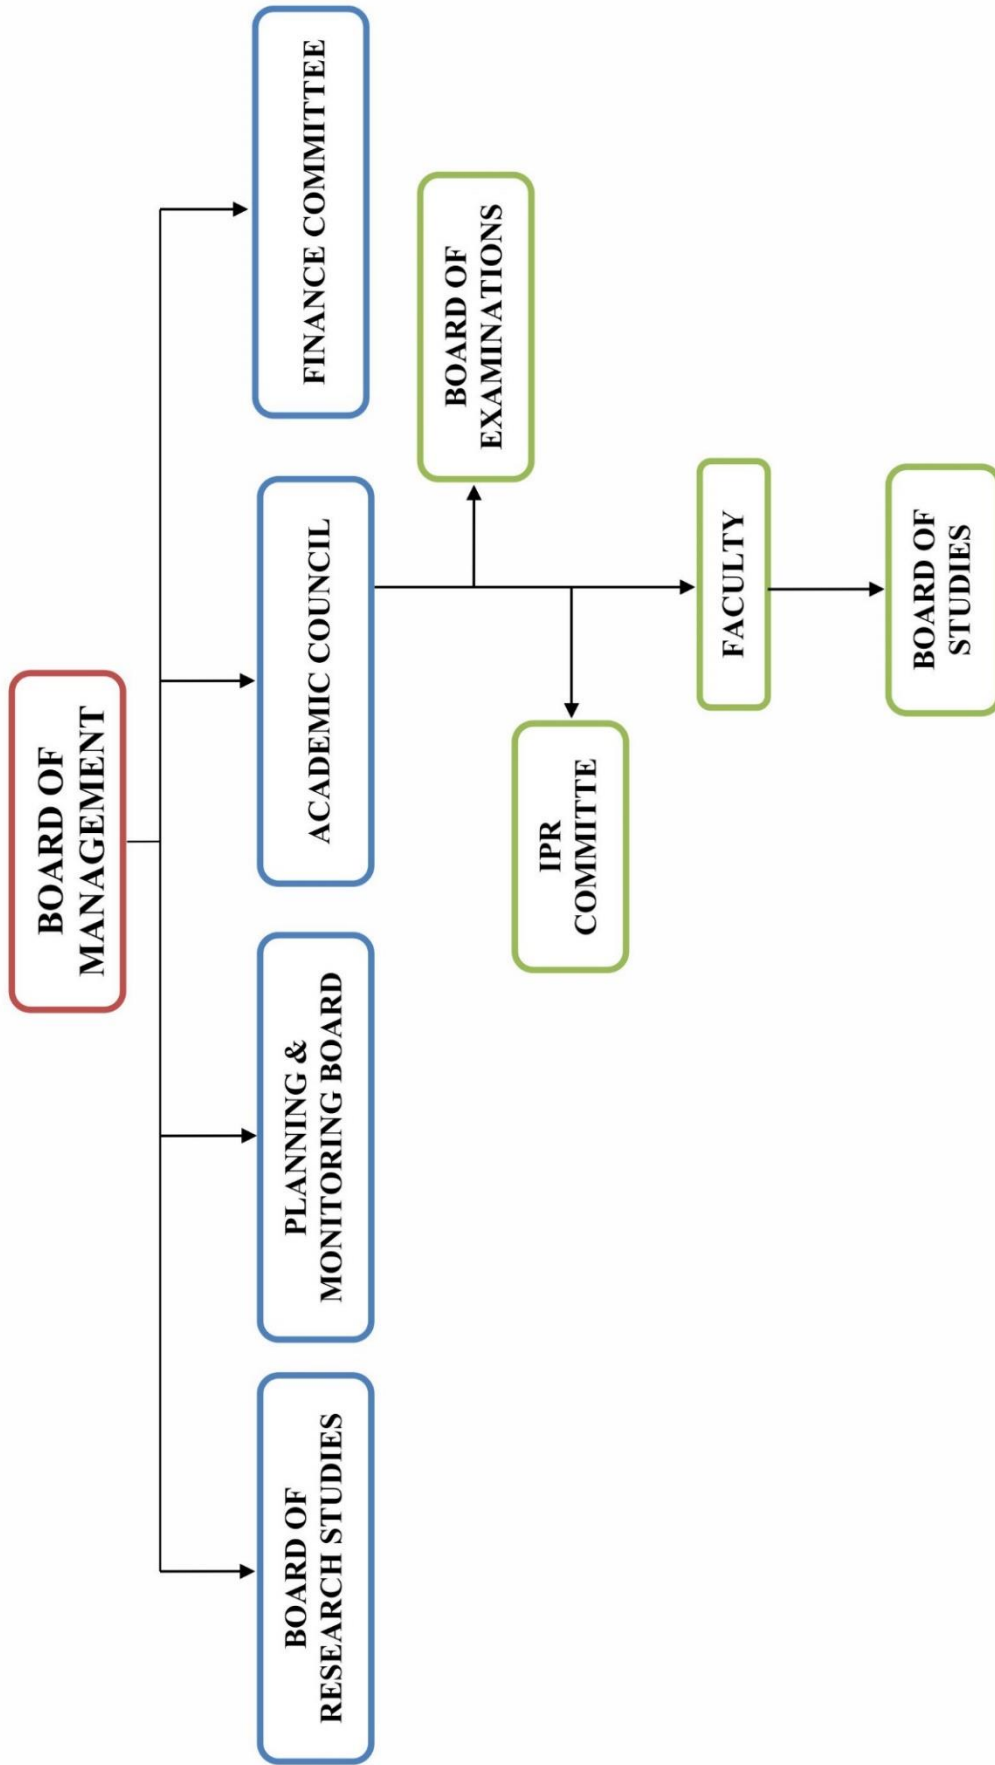

Linnaeus-Palme exchange program between DPU and University of Skövde, has been funded by the Swedish Council of Higher Education, under which two students from University of Skövde, Sweden are pursuing one academic semester (2018-2019) at Dr. D. Y. Patil Biotechnology & Bioinformatics Institute, Pune. The MOU between University of Skövde, Sweden and Biotechnology Institute, DPU, Pune has been renewed for three years with effect from current academic year (2018-2019) for exchange of faculty, research staff and students. Similarly, two students from B. Tech. Medical Biotechnology are pursuing one academic semester and one student from M.Tech. (Int.) Biotechnology is doing one year dissertation project (2018-2019) at University of Skövde, Sweden. Also four faculty members of University of Skövde, Sweden visited DPU on 19th November, 2018 for the purpose of Extension of the existing collaborations and interaction with the faculty.

The Department of Global Health Education, Johns Hopkins University, USA has been sending their students in batches to our medical and nursing institutes, to provide them global health training at DPU, by fostering a collaborative learning environment under their Global Health leadership programme. Department of Medicine holds video conferences regularly once a month 'Global Grand round in infections' with Johns Hopkins University.
